	Examiner Stephone B. Allen	Art Unit 2878	<i>AW</i>

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Reissue Applications

The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 5,885,840 to Kamentsky et al. (Kamentsky).

Kamentsky discloses a scanning microscope (flow cytometer) that scans a sample 105 with a laser beam 101 from laser 112, the microscope comprises a spectral resolving unit; a wavelength splitter 103 that splits the fluorescent rays into rays of a plurality of different wavelengths; and a plurality of photomultipliers provided in the path of the rays; wherein the photomultipliers are disposed such that their axial centers come with planes to be resolved by the resolving unit (col. 6, line 35 – col. 7, line 27).

Kamentsky is silent as to the photomultipliers being that of side-on type photomultipliers. However, it would have been obvious for one of ordinary skill in the art

to use a side-on in the present invention, since it is well known that side-on type highly sensitive, less expensive, and provide increased accuracy.

Allowable Subject Matter

Claims 1-6 remain allowable over the prior art.

Claims 8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephone B. Allen whose telephone number is (571) 272-2434. The examiner can normally be reached on Mon-Thurs from 0900-1700.
